GRAMMY® Award-winning, Diamond-certified superstar **Young Thug** ascends to new heights with today’s release of his long awaited fourth solo album, *UY Scuti*, available now via Young Stoner Life Records/300 Entertainment. Listen to *UY Scuti* [HERE](#).

*UY Scuti* – which takes its name from what is often called the biggest known star in the Universe, a red supergiant located 5,900 light-years away in the constellation Scutum – is among the most highly anticipated releases in recent memory thanks to an ongoing series of enigmatic clues and online teases. The album was heralded earlier this month with the epic “**Miss My Dogs**,” available everywhere now [HERE](#). Produced by frequent collaborator London on Da Track and BeatsByJuko, the seven-minute track is joined by an official music video streaming [HERE](#).

This spring saw Young Thug make his triumphant return with “**Money On Money (Feat. Future)**” available now [HERE](#). Produced by Southside, Wheezy, Beatzbyrose, Dez Wright, 9Jay, and Juke Wong, the track – which marked the massively influential hip-hop icon’s first new solo track in more than 18 months – is joined by an official music video directed by Kaito and Brendan O’Connor, currently boasting **over 16M** views [HERE](#). “Money on Money” proved a sensation upon its release, reaching the top 10 on *Billboard*’s “Hot R&B/Hip-Hop Songs” and the top 40 on the overall Hot 100 amidst critical acclaim from the likes of *Rolling Stone*, *Vulture*, *Consequence*, and *Billboard*, the latter of which declared it “*a banger of a lead single.*”
